

FH300RC TWIN HEAD
Iss 2. Metal Halide / UV
Glass Remote Control
Variable Speed

APPLICATION

The FRANCIS TWIN HEAD Range of Remote Control searchlights has been designed with the precise aim of bringing to the market, the ultimate searchlight for both navigation and search and rescue.

The FH300RC has two light sources within the twin headed design, one white light and the other UV light, therefore able to identify oil spill hazards.

The quality and design of structure has been carefully developed to withstand the extraordinary conditions while in use in the harshest of environment, such as Coast Guard patrol. The heavy duty variable speed gearbox is strong, powerful and able to operate in the rough seas and high strength winds as found in coastal areas throughout the world.

These units are particularly suitable for use on patrol Craft, custom vessels and is used extensively in security applications.

The metal halide offers a colour temperature of 6000k similar to daylight, and offers exceptional illumination, especially in polar regions and long range navigation.
