

L380RC Issue 2
LED 600w
Remote Control

APPLICATION

The Francis L380RC 600 LED searchlight range continues to develop and offers an Efficiently and Environmentally Friendly alternative to traditional lamp sources. Using the highest grade of LED, this range offers a high power output with low power consumption.

The 600w LED gives illumination characteristics similar to that of a 6Kw halogen lamp. Using a series of precision made glass lenses to optimize and collimate the light output, to achieve a greater range and output. This model offers a focus adjustment of the beam from 8° spot to 15° flood.

Francis Searchlights have developed and improved all remote controlled searchlights across the range still further by adding full variable speed, a modern and sleek joystick control panel, using membrane and LED technology, offering Bus Control, auto home position setting, with Optional Controls available on request.

The Francis bus (FBUS) is a custom communication protocol based on RS485 two-wire bi-directional communication hardware. The system provides a simple bi-directional link between searchlights and control panels.

As with all Francis products, the construction is robust and of the highest quality of construction.

Utilizing excellent thermal management of the LED chip ensures successful performance and chip life.
